Dear Letitia and Bob,

Thank you so much for providing an exceptional professional development program for the educators of Warren County, New Jersey on October 13, 2008. As chairperson of the Warren County Wide In-Service Program, my goal was to find a keynote presentation that would meet the professional development needs of a variety of educators within Warren County. The True Colors Live-Show met my criteria because all educators are faced with working in teams for the common good of the school district and the students. The show taught us about the four personality types and how each type is integral to the group process.

After working with you for several months prior to the presentation, I was confident the show would be worthwhile. However, I can honestly say the show exceeded my expectations. The four actors from New York City were incredible! They had us laughing and clearly portrayed the color personality they were attempting to portray. I particularly enjoyed the multi-faceted approach to this presentation, which incorporated audience participation, hands-on materials, and the live show. The commentator, Tanya Moberly, was helpful in individualizing the show to make it more meaningful for our Warren County educators and providing a limited lecture portion of the show to ensure everyone understood the message and purpose of the True Colors ideology.

I would be happy to recommend the True Colors Live-Show to other school districts who are looking for a quality presentation for their educators. It was a pleasure working with all of you. Your pleasant, enthusiastic, and organized approach to professional development made our experience enjoyable and stress-free. Thank you for all your efforts and best wishes to you and your organization.

Very truly yours,

Regina M. Swierc
